# LOOK FOR THESE TWO NEW WHEAT DISEASES!

## FLAG SMUT

This destructive disease already is in one county in Illinois.

The plants are so badly injured that they seldom head out.

Look for the disease and help check its spread.

## TAKE-ALL

This disease usually stunts plants in irregular patches, causing a spotted appearance in the field.

Watch for such spots.

Healthy wheat plant at left and stunted diseased plants of same age at right.

Portion of infested spot.

Write State Agricultural College or U. S. Department of Agriculture if you find either of these diseases.
